Web Developer and Designer

I am seeking a challenging position in an environment that will allow me to advance in the organization while improving my skills as a Web Designer and developer. I have studied independently and formally in the field of Computer Science for several years. I am most interested in front end development and the positive impact quality design can have for a business, but I enjoy solving other software problems as well. I like being challenged with new tasks, and often pick up and learn new technologies for fun.

My skills include:
- Web application development in PHP and Ruby on Rails.
- Exposure to C++, JavaScript, jQuery, Java, PHP, mySQL, HTML, CSS, Swift and other languages.
- Experience developing and publishing from Microsoft WebMatrix.
- Experience with Eclipse, Netbeans, Microsoft Visual Studio, Atom and other text editors/IDE's.
- Experience with FTP programs (FileZilla).
- Several years experience with content creation.
- Writing and editing.
- Photography and editing.
- Keen memorization, retention and understanding of complex ideas.
- Highly effective communication skills, excellence with team projects.
- Knowledge of Joomla, Wordpress and Drupal.
- Experience with Phonegap, RubyMotion and Git.
- Experience working with wireframes.
- Experience with Windows and Unix/Linux

PROFESSIONAL EXPERIENCE

Universally Thinking   **December 2012 - Present**
Creative Director
- Motivate, influence and inspire people to think abstractly, encourage logical ambition
- Included maintenance of existing sites as well as building new ones.
- Worked on multiple projects at a time with short turn-around time.
- High profile marketing sites that require high availability.
- Oversee website hosting and migration.
- Create and maintain quality content.
- Work with PHP sites and mySQL databases.

Interactive Design Solutions   **March 2014 - 2014**
Sales/Web Development

- Learned the fundamentals of Web Development.
- Demonstrated ability to manage hosting.
- Sought customers who could benefit from quality, affordable websites.

VOLUNTEER EXPERIENCE

SaveARescue.org

I recently volunteered for SaveARescue.org as an on-call volunteer. I read through the existing code and created a backup for insurance purposes. I have re-sized images, updated content, adjusted styling and much more.

AccessHelp.org

I update and maintain AccessHelp.org as an on-call volunteer. I have read through the existing code and created a backup for insurance purposes. I have re-sized images, updated content, adjusted styling, and much more.
